

Activating Your ChronoGolf Account

The following will walk you through the process to activate and access your ChronoGolf account via the web browser. When your account was originally setup, you would have been sent an email from ChronoGolf with instructions to activate your account so if you have already done this you don't need to do anything else. Also, if you have used ChronoGolf at other clubs, you don't need to do anything either as you should see your Heritage Harbour Golf Club membership in your existing account.

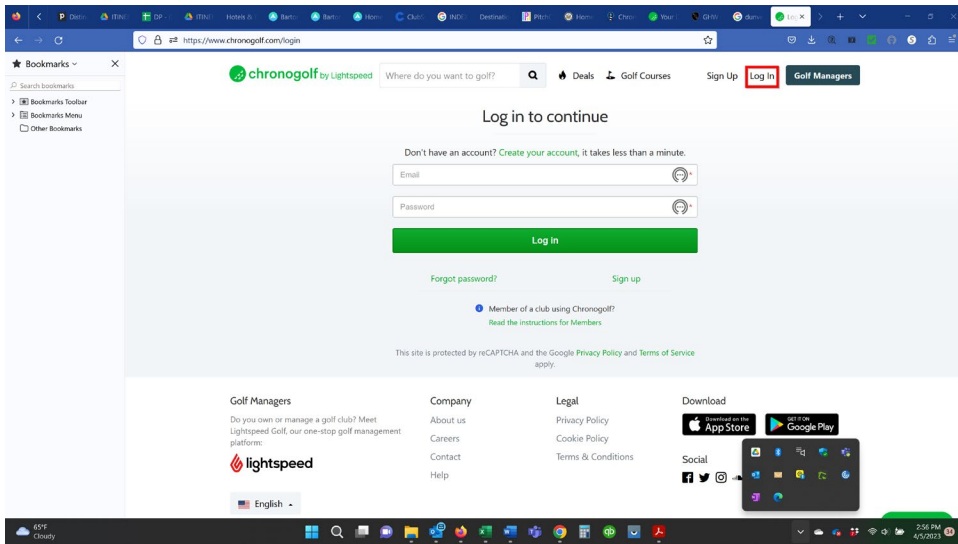

For any members that have NOT provided an email address you will need to contact the Golf Shop with your email address so that they can add it to your customer account which will then create/update your ChronoGolf Account. For people that have family memberships, if you want to have your own ChronoGolf account in order to be able to separately book your tee times you will need to provide a separate email address for each family member. Since there just require a single subscription you can all just book and manage your account under a single person in the family.

Here are the steps to activate/access your account:

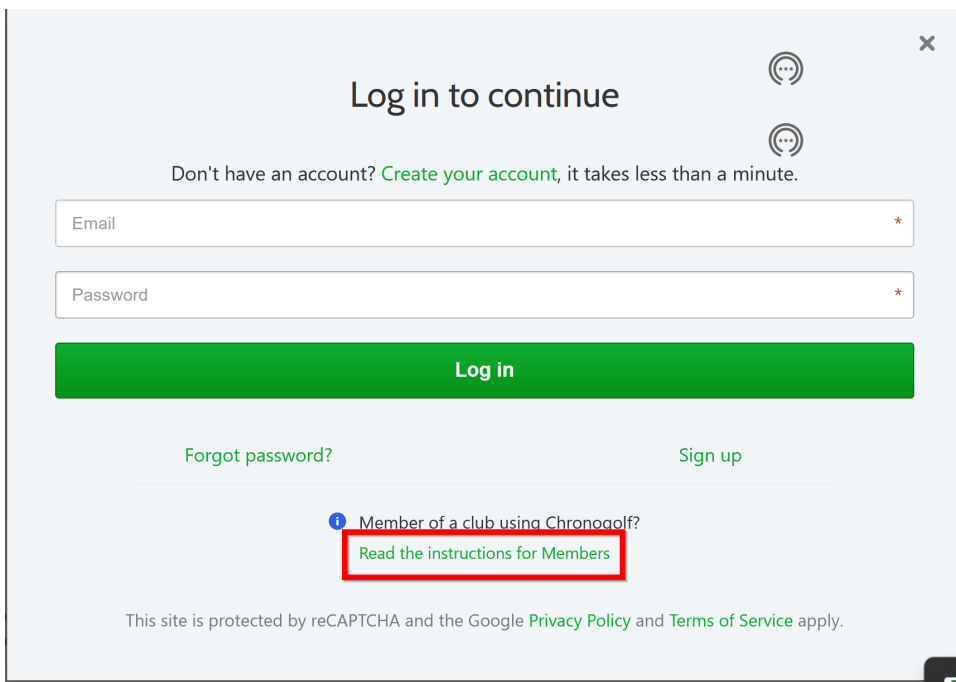

1. Open up any browser window on your computer and enter the following:
www.chronogolf.com
2. This will then display the following screen

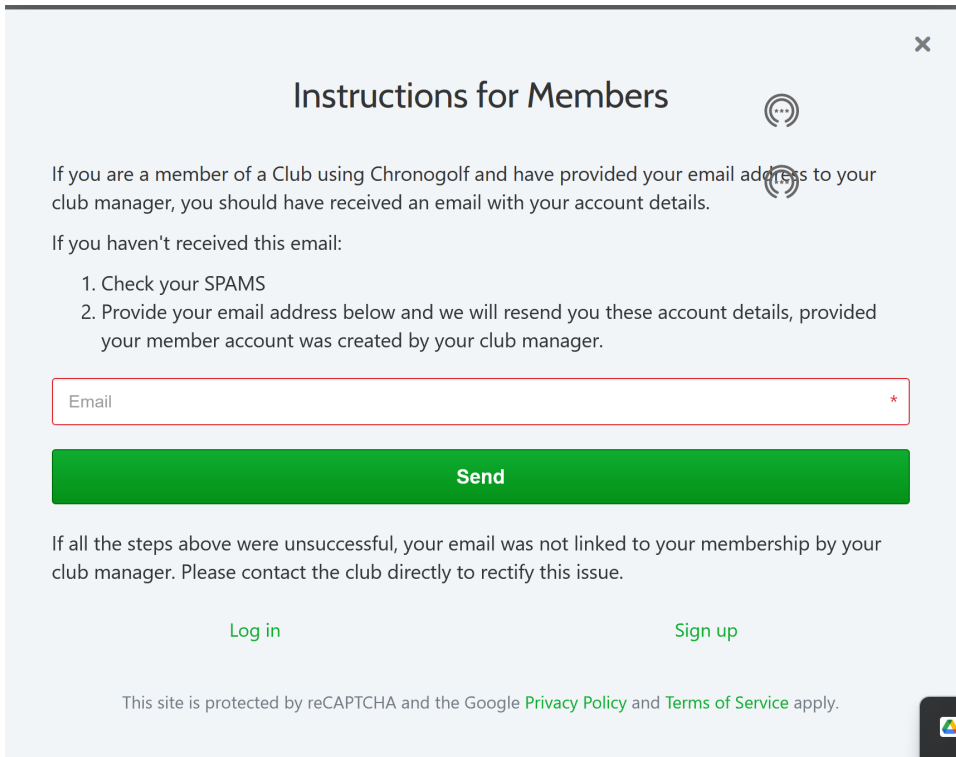

3. Click on the "Log In" button in the upper right hand corner

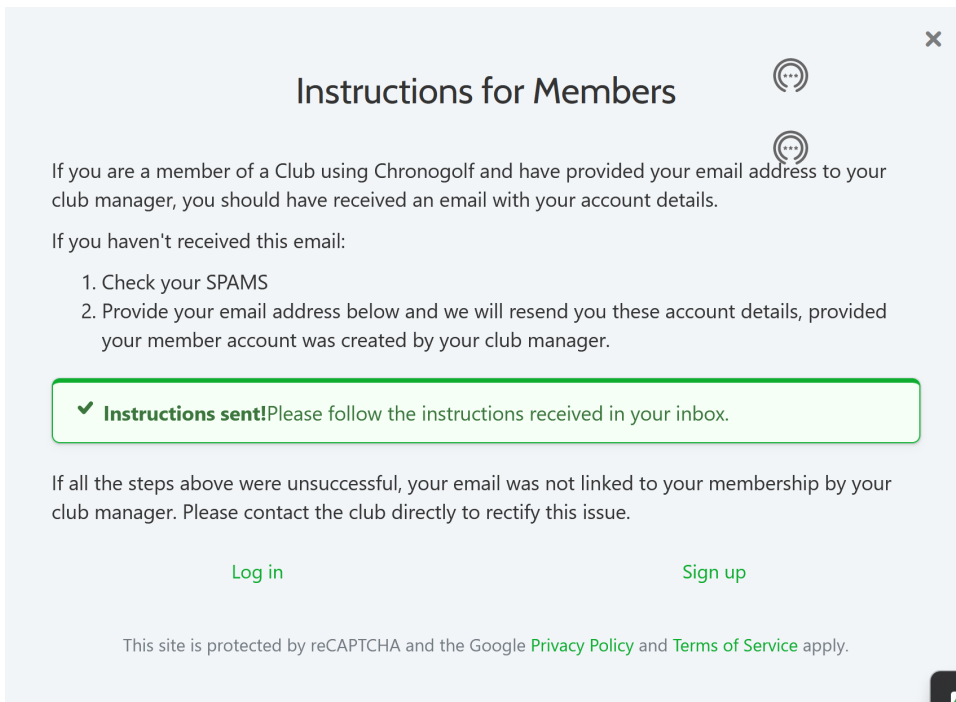

4. This will provide the following “pop up” window where you will click on the “Read the instructions for Members option as shown below.

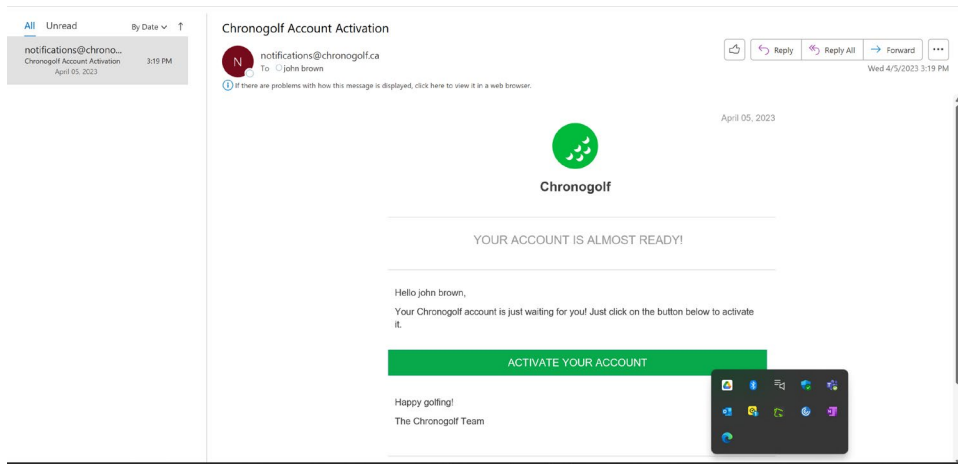

5. This will then display the following window where you will enter the email address that you have provided to Heritage Harbour for your account.

6. Enter your email address and click the “SEND” button. You will receive the following message on the screen if it has successfully sent the email to you:

7. This will then send you an email with a link to finalize the setup of your account. If you don't receive anything in your inbox, make sure to check your SPAM folder for this. The email will look like the following:

8. If you had already activated your account previously the email will look slightly different and will be a "Password Reset" email as follows. You can either use this and reset your password or if you recall setting it up you can just use the standard login procedure.
